# FLEXIBLE

Privacy shield / Noise protection

Our new privacy shield FLEXIBLE creates favourite spots in which you can sink into relaxation completely. FLEXIBLE not only protects you from prying looks, but also helps you to enjoy acoustic peace. Special insulation provides better noise protection, screening off annoying sounds from the outside.

FLEXIBLE consists of aluminium posts and slats that are striated on both sides which can be easily slotted in above one another. It is possible to adjust the posts by 10 cm to each other, meaning that you can flexibly adapt them to the surroundings. FLEXIBLE can be equipped with window modules made of stainless steel or acrylic glass, and a garden gate is also available. Our new privacy shield is available in the colours brown, anthracite, and in modern titanium grey.

– You can find an assembly video for Flexible at [www.naturinform.com](http://www.naturinform.com)

## FLEXIBLE'S STRUCTURE

## WPC FENCE AND ACCESSORIES

# EFFECTIVE

## Privacy shield

EFFECTIVE, Brown

Our EFFECTIVE privacy Shield is our range's bargain offer, opening up a large variety of options. Thanks to its modular set-up you can choose any height or width you would like. As it is available in the colours brown, grey and anthracite in combination with an aluminium post as a ground post or with a concrete slab onto which it is attached, it can be used in many different ways. Corners can be combined with FLEXIBLE posts. EFFECTIVE uses slot and key profiles that can easily be attached onto one another and are thereby adjustable both in height as in width. Using decorative elements made of stainless steel or acrylic polymer (simple or triple size of a slat) EFFECTIVE adapts to your personal requirements.

### EFFECTIVE'S STRUCTURE

### PROFESSIONAL TIP

*Simply adapt our privacy shield fences to your very own favourite spot's requirements: The slats can be shortened individually, thereby reducing the gap between the posts.*
